MCPlayer.mcd

File identifier (mandatory first row):

```
* Magic Contest * MCPlayer.mcd * File version: 004.007 * Check sum: 9923 *
```

Empty rows are ignore as well as rows starting with double slashes (//) that can be used for commenting the file.

MCPlayer is sent by e-mail to the licencee from the NBO. MCPlayer contains member information from the NBO database.

The licencee will, at installation of Magic Contest, import a complete list of members that contains only Member header and Member info. After this initial import the licencee will at certain intervals send a MCPlayerQ file to the NBO and automatically ask for updates, for instance all changes since last update or Extra info for a group of members. The NBO will return a MCPlayer file with the information asked for.

* = Mandatory fields

File header

90 *	NBO	NBO (National Bridge Organization). This value is sent to the licencee in order to verify the origin of the file.
91 *	NBO e-mail address	When the licencee generates a MCPlayerQ file, that file is to be sent to the NBO. One way is by automatic e-mail where this e-mail address is used. Another way is for the licencee to create an e-mail manually. This e-mail address is shown to the licencee after the file has been created.
92	NBO message	Message from the NBO to the licencee.
94	Licencee	See MCPlayerQ. This field is only supplied if the MCPlayer file was generated by a MCPlayerQ query file. In that case the licencee from the MCPlayerQ file is returned.
96	Licencee contact information	See Licencee above.
97	Licencee e-mail address	See Licencee above.

NBO property

This NBO property section is used together with the NBO property field of the Member info section. A number of properties can be supplied for a member. Examples of properties are Junior, Gender, Tournament Director, etc. The NBO property field is a string where each position states a property. The NBO property section identifies each position of that field.

70 *	Position	Numerical. Position 1 is the first position of the NBO property field of the Member info section.
71 *	Caption	
72 *	Possible values	The possible values are separated by semicolons. Example: "0=Not defined;1=Female;2=Male"

NBO value

This NBO value section is used together with the NBO value field of the Member info section. A number of values can be supplied for a member. Examples of values are Masterpoints, Rating etc. The NBO value field is a string of fields separated by semicolons. The NBO property section identifies each string of that field.

75 *	Position	Numerical. Position 1 is the first position of the NBO property field of the Member info section.
76 *	Caption	
77 *	Field type	0 = Integer. 1-3 = Double with 1-3 decimals. 4 = String. 5 = Boolean.

Member header

00 *	Member ID	Member ID may contain both letters and digits.
		A plus member, i.e. a player created by Magic Contest and saved in the member database, may be reported to the NBO through the use of the MCPlayerQ.mcd file. After the report, the member data is returned from the NBO along with an official NBO member ID. In such a case, the format mmm&¤#ppp is used where mmm=NBO member ID and ppp=original plus member number (including the plus sign).
		If a reported plus member already existed in the NBO member file, the format ppp¤%&mmm is used to send a signal to Magic Contest to set the status of the plus member as deleted. At this kind of report no other fields are mandatory. .
01	Status	0=Active. 1=Not active. 2=Deleted. 3=Deceased.

File identifier (mandatory first row):

```
* Magic Contest * MCPlayer.mcd * File version: 004.007 * Check sum: 9923 *
```

Member info

02 *	Last name	The combination of Last name and First name or just 04=Name is mandatory.
03 *	First name	
04 *	Name	The format must be "Last name, First name".
05	Club	
06	District	
07	NCBO property	See NBO property section above.
08	NCBO value	See NBO value section above.
09	National handicap	The first record contains the handicap definitions as well as the handicap. The remaining records contains only the handicap.

    Format: Type, Hcp100, HcpName, KeepAverage, Mult100, DecimalCount
    Example: 0,1200,National handicap,1,50,1
    Type: 0=Percentage. 1=IMP.
    KeepAverage: 0=No. 1=Yes.

Extra info: Address

10	c/o
11	Address
12	Zip code
13	City
14	State
15	State abbreviation
16	Country

Extra info: Phone

20	Phone (home)
21	Phone (work)
22	Phone (mobile)

Extra info: Internet

30	E-mail address
31	URL

Extra info: Personal data

40	Birthday	Format: YYYY-MM-DD
41	Sex	0=Unknown. 1=Woman. 2=Man.
42	Title	Free text: Mr, Mme, Mlle, etc

Extra info: Team

50	TeamID	Numerical ID that can be used as an identifier
51	Team	
52	Country (ISO)	
53	Country (IOC)	

File footer

99	Previous update	Date and time when the file was created. This date can be supplied in MCPlayerQ.txt to ask for updates from a certain date. The format is optional and the same format will be returned.
